

## About This Manual

This user manual provides a complete guide to using the **Ritinjali Management Information System (MIS)**.

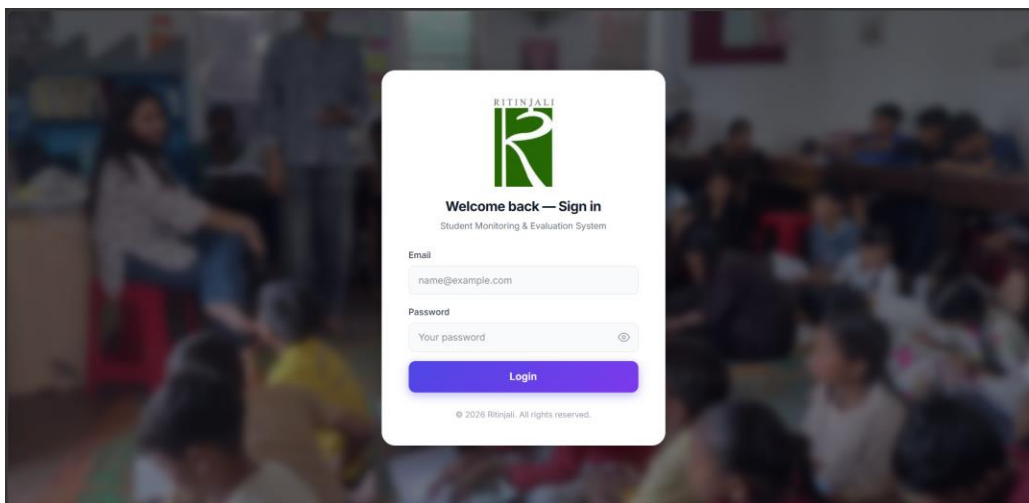

The MIS is designed to help Ritinjali manage information and day-to-day operations across its **school, students, programs, activities, and multiple branches** through a centralized administrative system.

This manual explains the different modules available in the MIS, their purpose, and the steps required to perform common administrative tasks.

# 1. Login to Ritinjali MIS

## 1.1 Login Page

The Ritinjali MIS login page provides secure access to the **Student Monitoring & Evaluation System**. Authorized users must enter their registered email address and password to access the system.

The login page contains the following elements:

- **Ritinjali Logo** — Displays the Ritinjali identity.
- **Email** — Field for entering the user's registered email address.
- **Password** — Field for entering the user's password.
- **Login** — Button used to submit the entered credentials and access the MIS.

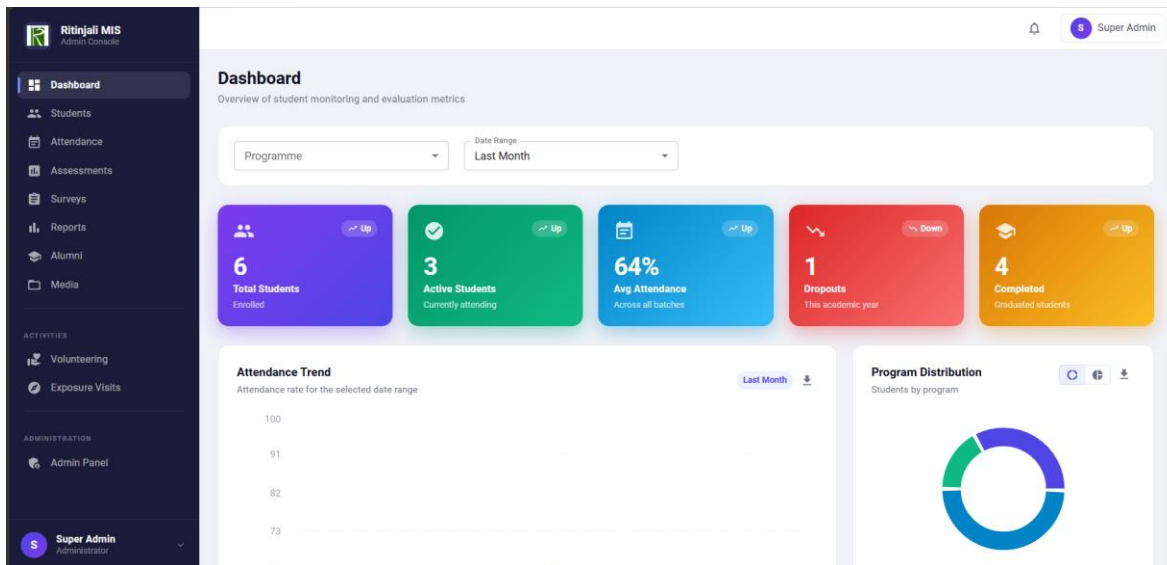

## How to Log In

1. Open the Ritinjali MIS login page.
2. Enter your registered **Email** address.
3. Enter your **Password**.
4. Click **Login**.
5. If the credentials are valid, the system will provide access to the MIS dashboard.

## Important Note

Only authorized users with valid login credentials can access the Ritinjali MIS.

## 2. Dashboard

### 2.1 Dashboard Overview

The **Dashboard** provides an overview of key student monitoring and evaluation metrics. It allows users to view student statistics, attendance trends, programme distribution, placement information, and academic-level distribution for the selected programme and date range.

#### Dashboard Filters

At the top of the dashboard, users can select:

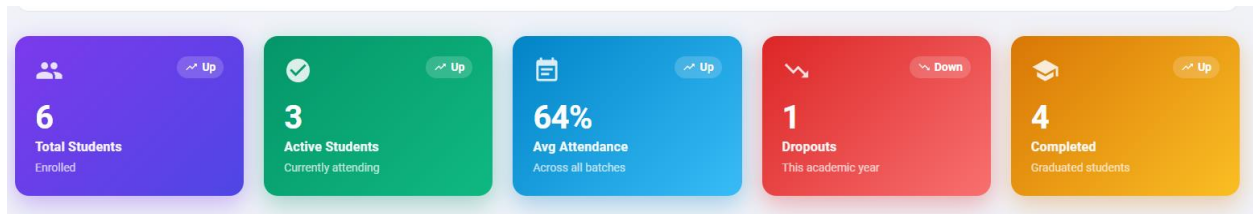

- **Programme** — Used to view dashboard information for a specific programme.
- **Date Range** — Used to select the period for which the dashboard information should be displayed.

#### Navigation Sidebar

The **sidebar** provides quick access to the different sections of the Ritinjali MIS. Users can navigate between modules such as **Dashboard**, **Students**, **Attendance**, **Assessments**, **Surveys**, **Reports**, **Alumni**, **Media**, **Volunteering**, **Exposure Visits**, and **Admin Panel** using the sidebar menu.

**Tip:** Use the sidebar to move between different sections of the MIS without returning to the dashboard.

## 2.2 Student Overview

The dashboard displays key student-related indicators:

### Total Students

Displays the total number of students enrolled in the system.

### Active Students

Displays the number of students who are currently attending.

### Average Attendance

Displays the average attendance percentage across all batches.

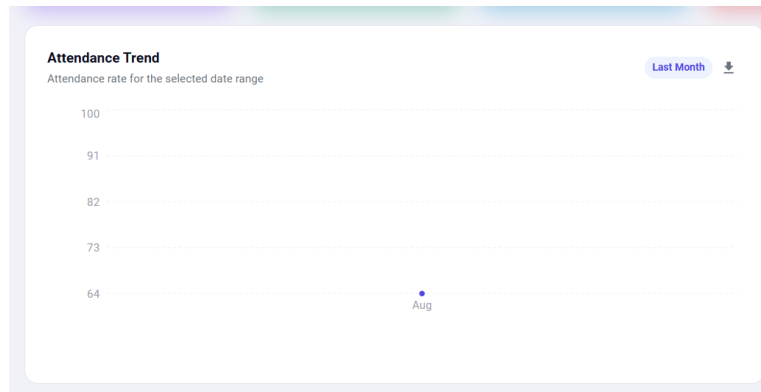

### Dropouts

Displays the number of students who have dropped out during the academic year.

### Completed

Displays the number of students who have completed their programme or graduated.

## 2.3 Attendance Trend

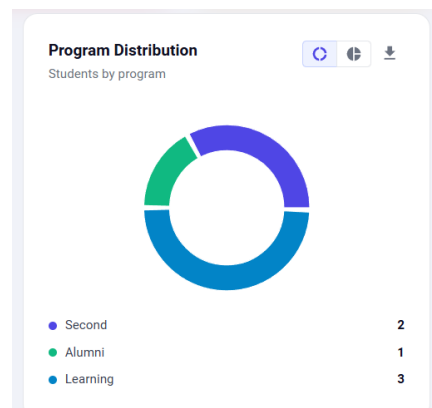

The **Attendance Trend** section displays the attendance rate for the selected date range.

This section helps users understand how attendance has changed over the selected period.

The dashboard provides a **date-based attendance graph** for monitoring attendance trends.

## 2.4 Program Distribution

The **Program Distribution** section displays the number of students associated with each programme.

This allows users to understand how students are distributed across different programmes.

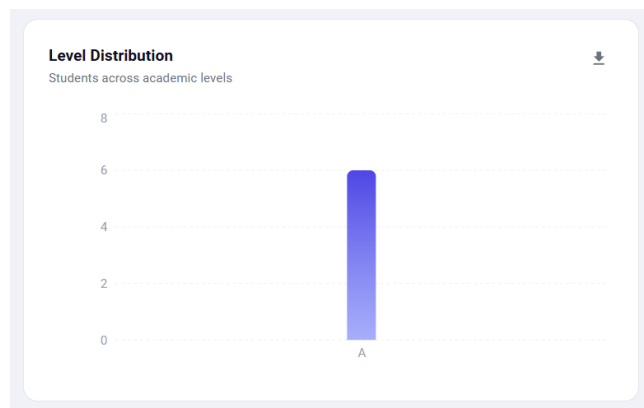

## 2.5 Sector-wise Placement

The **Sector-wise Placement** section displays student placement information for students placed through **Phase 2 and Phase 3**.

The information is presented graphically according to the relevant placement sectors

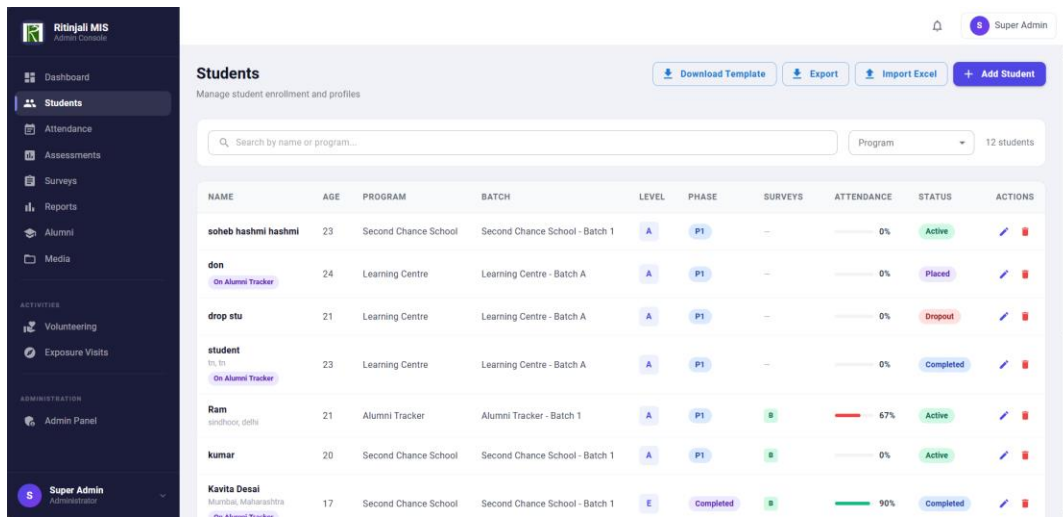

## 2.6 Level Distribution

The **Level Distribution** section displays the distribution of students across different academic levels.

This provides an overview of the number of students at each level within the selected programme and date range.

## 3. Students

The screenshot shows the 'Students' module interface. On the left is a dark sidebar with navigation links: Dashboard, Students (selected), Attendance, Assessments, Surveys, Reports, Alumni, Media, Activities (Volunteering, Exposure Visits), and Administration (Admin Panel). The main content area has a header with 'Students' and 'Manage student enrollment and profiles', along with buttons for 'Download Template', 'Export', 'Import Excel', and 'Add Student'. Below this is a search bar and a dropdown for 'Program' showing '12 students'. The main table lists students with the following data:

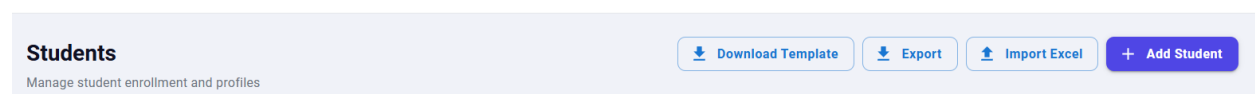

| NAME                | AGE | PROGRAM              | BATCH                          | LEVEL | PHASE     | SURVEYS | ATTENDANCE | STATUS    | ACTIONS         |
|---------------------|-----|----------------------|--------------------------------|-------|-----------|---------|------------|-----------|-----------------|
| soheb hashmi hashmi | 23  | Second Chance School | Second Chance School - Batch 1 | A     | P1        | —       | 0%         | Active    | [Edit] [Delete] |
| don                 | 24  | Learning Centre      | Learning Centre - Batch A      | A     | P1        | —       | 0%         | Placed    | [Edit] [Delete] |
| drop stu            | 21  | Learning Centre      | Learning Centre - Batch A      | A     | P1        | —       | 0%         | Dropout   | [Edit] [Delete] |
| student             | 23  | Learning Centre      | Learning Centre - Batch A      | A     | P1        | —       | 0%         | Completed | [Edit] [Delete] |
| Ram                 | 21  | Alumni Tracker       | Alumni Tracker - Batch 1       | A     | P1        | B       | 67%        | Active    | [Edit] [Delete] |
| kumar               | 20  | Second Chance School | Second Chance School - Batch 1 | A     | P1        | B       | 0%         | Active    | [Edit] [Delete] |
| Kavita Desai        | 17  | Second Chance School | Second Chance School - Batch 1 | E     | Completed | B       | 90%        | Completed | [Edit] [Delete] |

### 3.1 Students Overview

The **Students** module is the central location for managing and monitoring student records within the Ritinjali MIS. This page provides users with a consolidated view of all students registered in the system and their current programme-related information.

The page is used to **add new students, review existing student records, monitor student progress, and maintain up-to-date student information**. It brings together important information such as the student's programme, batch, academic level, phase, survey information, attendance, and current status in one place.

### 3.2 Student List Controls

This section shows the controls for the student list. It includes a header with 'Students' and 'Manage student enrollment and profiles', and a row of buttons: 'Download Template', 'Export', 'Import Excel', and 'Add Student'.

The Students page provides the following controls:

#### Download Template

Downloads the template required for preparing student data for import.

## Export

Exports student information from the system.

## Import Excel

Allows student information to be imported using an Excel file.

## Add Student

Opens the option to add a new student to the system

## 3.3 Student List

| NAME                                                  | AGE | PROGRAM              | BATCH                          | LEVEL | PHASE     | SURVEYS | ATTENDANCE | STATUS    | ACTIONS                                                                                                                                                                     |
|-------------------------------------------------------|-----|----------------------|--------------------------------|-------|-----------|---------|------------|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| soheb hashmi hashmi                                   | 23  | Second Chance School | Second Chance School - Batch 1 | A     | P1        | —       | 0%         | Active    |       |
| don<br><small>On Alumni Tracker</small>               | 24  | Learning Centre      | Learning Centre - Batch A      | A     | P1        | —       | 0%         | Placed    |   |
| drop stu                                              | 21  | Learning Centre      | Learning Centre - Batch A      | A     | P1        | —       | 0%         | Dropout   |   |
| student<br>tn, tn<br><small>On Alumni Tracker</small> | 23  | Learning Centre      | Learning Centre - Batch A      | A     | P1        | —       | 0%         | Completed |   |
| Ram<br>sindhoor, delhi                                | 21  | Alumni Tracker       | Alumni Tracker - Batch 1       | A     | P1        | B       | 67%        | Active    |   |
| kumar                                                 | 20  | Second Chance School | Second Chance School - Batch 1 | A     | P1        | B       | 0%         | Active    |   |
| Kavita Desai<br>Mumbai, Maharashtra                   | 17  | Second Chance School | Second Chance School - Batch 1 | E     | Completed | B       | 90%        | Completed |   |

The student list displays the following information:

- **Name** — Name of the student.
- **Age** — Student's age.
- **Program** — Programme in which the student is enrolled.
- **Batch** — Batch associated with the student.
- **Level** — Current academic level of the student.
- **Phase** — Current programme phase or placement phase.
- **Surveys** — Indicates the relevant survey information associated with the student.
- **Attendance** — Displays the student's attendance percentage.
- **Status** — Shows the current status of the student, such as **Active**, **Completed**, **Placed**, or **Dropout**.

- **Actions** — Provides available actions for managing or viewing the student record.

The list can be used to review student information and monitor their current progress and status.

## 3.4 Add New Student

**Add New Student**

PERSONAL FAMILY & ADDRESS EDUCATION PHASE 2 PHASE 3

Full Name \* Age \*

Gender \* Male Nationality Indian

Aadhaar Card Number \* Blood Group

Email ID Personal Phone

Emergency Contact Program \* Second Chance School

Batch \* Second Chance School - Batch 1 Level \* A

Enrollment Date \* 08/27/2026 Status \* Active

CANCEL Add Student

The **Add New Student** form is used to create a new student record in the MIS. The form is divided into different sections to capture the student's personal, family, education, and programme-related information.

### Sections

- **Personal** — Enter basic student details such as name, age, gender, contact information, programme, batch, level, enrollment date, and status.
- **Family & Address** — Enter the student's family and residential details.
- **Education** — Enter the student's educational information.
- **Phase 2** — Enter relevant Phase 2 information.
- **Phase 3** — Enter relevant Phase 3 information.

Fields marked with (\*) are mandatory.

After completing the required information, review the details and click **Add Student** to create the student record. Click **Cancel** to exit without saving.

## 3.5 Student Records

Each student appears as an individual record in the student list. The record may contain information such as:

- Personal details
- Programme and batch
- Academic level
- Programme phase
- Survey information
- Attendance percentage
- Student status
- Alumni tracker information, where applicable

Some student records may display **On Alumni Tracker**, indicating that the student is associated with the Alumni Tracker.

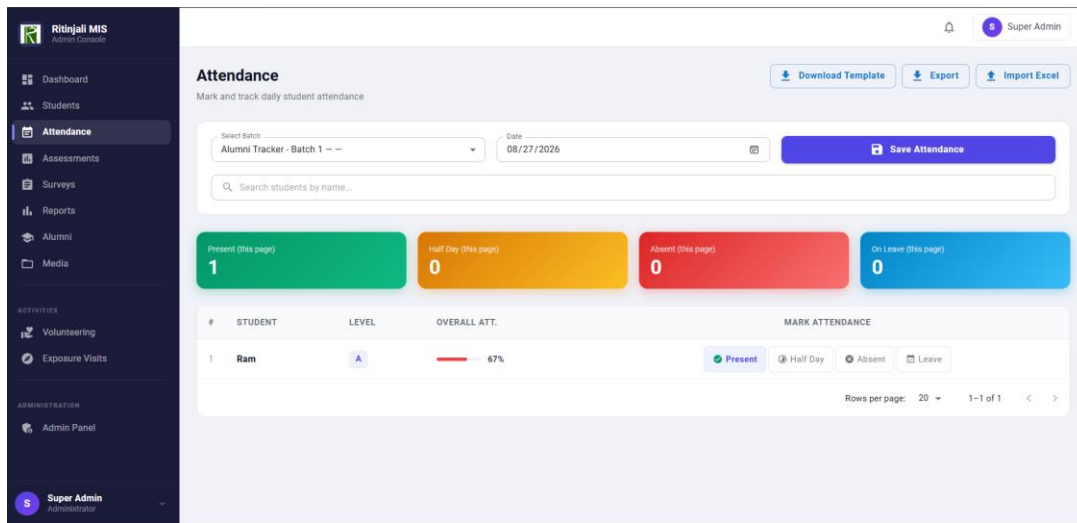

## 3.6 Student Status

The **Status** field indicates the current stage of the student.

The system may display statuses such as:

- **Active** — Student is currently active in the programme.
- **Placed** — Student has been placed.
- **Completed** — Student has completed the programme.
- **Dropout** — Student has dropped out of the programme.

## 4. Attendance Management

### 4.1 Attendance Overview

The **Attendance** module is used to record and monitor the daily attendance of students. Users can select a batch and date, mark the attendance of individual students, and save the attendance records.

The page also provides options to search students, view attendance summaries, and import or export attendance data.

### 4.2 Select Batch

The **Select Batch** option is used to choose the batch for which attendance needs to be recorded.

#### Steps

1. Click **Select Batch**.
2. Select the required batch from the list.
3. The students associated with the selected batch will be displayed below.

**Note:** Always select the correct batch before marking attendance.

## 4.3 Select Date

The **Date** field is used to select the date for which attendance is being recorded.

### Steps

1. Click the **Date** field.
2. Select the required date.
3. The attendance can then be marked for the selected date.

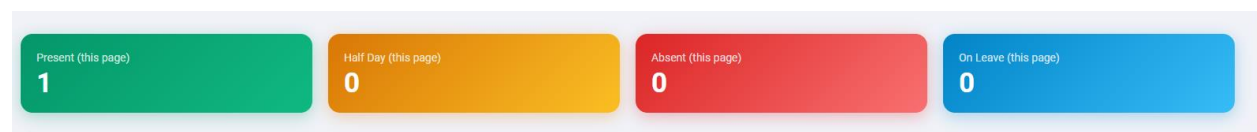

## 4.4 Search Students

The **Search Students** field allows users to quickly find a particular student in the selected batch.

### Steps

1. Enter the student's name in the search field.
2. The student list will be filtered based on the entered name.
3. Mark or review attendance for the required student.

## 4.5 Attendance Summary

The attendance summary displays the number of students marked under each attendance category for the current page.

- **Present** — Students marked as present.
- **Half Day** — Students marked for half-day attendance.
- **Absent** — Students marked absent.
- **On Leave** — Students marked as on leave.

The summary updates based on the attendance marked on the page.

## 4.6 Mark Attendance

The **Mark Attendance** section displays the students in the selected batch along with their level and overall attendance percentage.

Attendance can be marked using the following options:

- **Present**
- **Half Day**
- **Absent**
- **Leave**

### Steps

1. Select the required batch.
2. Select the attendance date.
3. Locate the student in the list.
4. Select the appropriate attendance status.
5. Repeat for the required students.
6. Review the marked attendance.
7. Click **Save Attendance**.

## 4.7 Save Attendance

The **Save Attendance** button is used to save the attendance marked for the selected batch and date.

Before saving, verify that:

- The correct **batch** is selected.
- The correct **date** is selected.
- The attendance status has been correctly marked for the students.

Click **Save Attendance** after completing the entries.

## 4.8 Download Template

The **Download Template** option provides an attendance template that can be used to prepare attendance data for import.

Users can download the template, enter the required attendance information, and use the completed file for bulk attendance entry.

## 4.9 Import Excel

The **Import Excel** option allows attendance information to be uploaded using an Excel file.

### Steps

1. Download the attendance template.
2. Enter the required attendance information in the template.
3. Save the Excel file.
4. Click **Import Excel**.
5. Select the completed file.
6. Upload the file and verify the imported records.

**Note:** Use the provided template format when preparing the Excel file for import.

## 4.10 Export

The **Export** option allows users to export attendance information from the system for further use or record keeping.

Click **Export** and follow the available download options to obtain the attendance data.

## 4.11 Rows Per Page

The **Rows per page** option controls how many student records are displayed at one time.

Users can change the number of displayed records using the available options and use the navigation controls to move between pages when required.

## 5. Assessments

The screenshot displays the 'Assessments' section of the RitiJal MIS Admin Console. The sidebar on the left contains navigation links for Dashboard, Students, Attendance, Assessments (highlighted), Surveys, Reports, Alumni, and Media. The main content area has a header with 'Assessments' and a subtitle 'Formative and summative assessments per student'. It includes buttons for 'Export', 'Download Template', and '+ Add Assessment'. A search bar is present with the text 'Search by student or topic...'. Below the search bar are three summary cards: 'Formative (this page)' with a count of 3, 'Summative (this page)' with a count of 3, and 'Students Assessed (this page)' with a count of 3. A table lists assessment records with columns: STUDENT, TYPE, TOPIC, METRIC, RESULT, DATE, REMARKS, and ACTIONS. The table contains six rows of data for students Ram, Amit Kumar, and Priya Sharma.

| STUDENT      | TYPE      | TOPIC                        | METRIC | RESULT          | DATE       | REMARKS                      | ACTIONS         |
|--------------|-----------|------------------------------|--------|-----------------|------------|------------------------------|-----------------|
| Ram          | Formative | new assessmet                | Score  | -24/100<br>-24% | 2026-08-13 | dcfvghnjmk                   | [Edit] [Delete] |
| Ram          | Summative | topiccc                      | Score  |                 | 2026-08-09 | jjjvvj                       | [Edit] [Delete] |
| Ram          | Summative | topiccc                      | Score  | 12/200<br>6%    | 2026-08-09 | jjjvvj                       | [Edit] [Delete] |
| Amit Kumar   | Summative | Life Skills - Communicati... | Score  |                 | 2026-03-12 | Excellent communication s... | [Edit] [Delete] |
| Priya Sharma | Formative | Work Readiness - Intervie... | Score  |                 | 2026-03-11 | Strong performance overall   | [Edit] [Delete] |
| Amit Kumar   | Formative | Mathematics - Fractions      | Score  | 82/100<br>82%   | 2026-03-10 | Good progress in mathemat... | [Edit] [Delete] |

The **Assessments** section is used to record and manage student assessments. It helps users maintain records of **Formative** and **Summative** assessments, including the assessment topic, result, date, and remarks.

### 5.1 Assessment Page

The assessment page displays all existing assessment records. Users can search, add, edit, delete, import, and export assessment information.

The page provides the following options:

- **Search** — Search assessment records by student name or topic.
- **Export** — Export assessment records from the system.
- **Download Template** — Download the template for preparing assessment data.
- **Add Assessment** — Create a new assessment record.

The summary cards display:

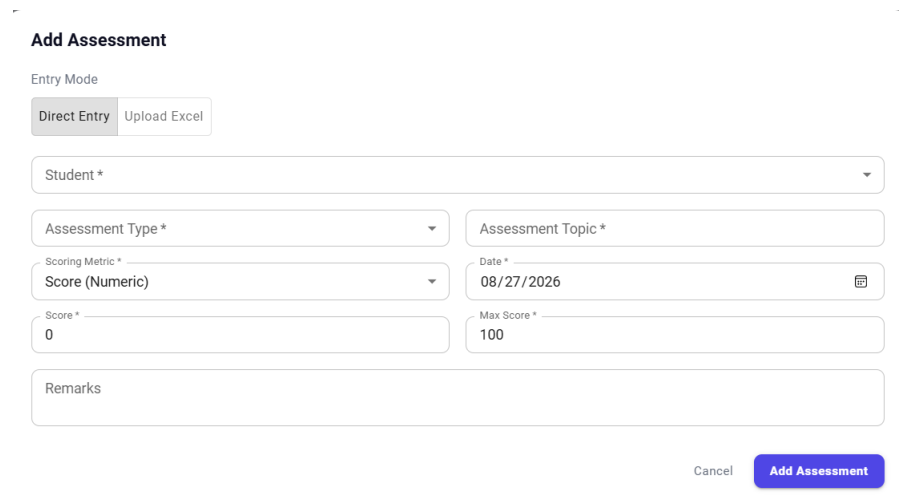

- **Formative** — Number of formative assessments displayed.
- **Summative** — Number of summative assessments displayed.
- **Students Assessed** — Number of students with assessment records.

## 5.2 Assessment Records

Each record displays the following information:

- **Student** — Name of the student assessed.
- **Type** — Type of assessment: Formative or Summative.
- **Topic** — Topic or subject of the assessment.
- **Metric** — Assessment metric used.
- **Result** — Score or result obtained.
- **Date** — Date of the assessment.
- **Remarks** — Additional comments or observations.
- **Actions** — Options to edit or delete the assessment.

## 5.3 Adding an Assessment

The screenshot shows a web form titled "Add Assessment". At the top, there are two tabs: "Direct Entry" (which is selected) and "Upload Excel". Below the tabs, the form contains several input fields: a "Student \*" dropdown menu, an "Assessment Type \*" dropdown menu, an "Assessment Topic \*" text field, a "Scoring Metric \*" dropdown menu with "Score (Numeric)" selected, a "Date \*" text field with "08/27/2026" and a calendar icon, a "Score \*" text field with "0", a "Max Score \*" text field with "100", and a "Remarks" text area. At the bottom right, there are two buttons: "Cancel" and "Add Assessment" (which is highlighted in blue).

To add a new assessment:

1. Click **Add Assessment**.
2. Enter the required assessment details.
3. Select the appropriate assessment type.
4. Enter the result and relevant remarks.
5. Review the information entered.
6. Save the assessment record.

## 5.4 Editing an Assessment

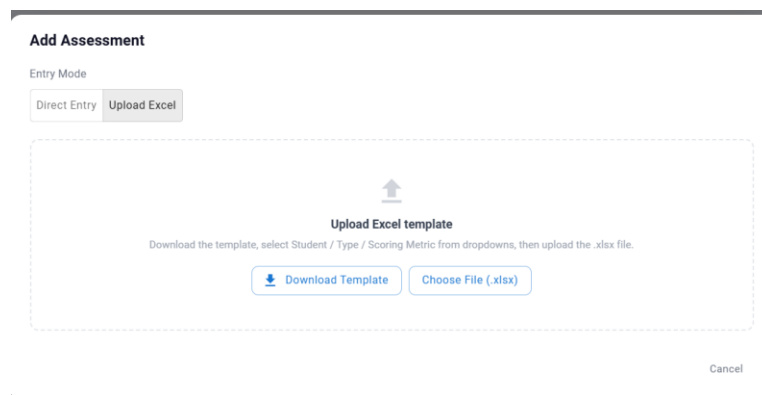

Use the **Edit** icon in the Actions column to modify an existing assessment record. Update the required information and save the changes.

## 5.5 Deleting an Assessment

Use the **Delete** icon to remove an assessment record. Review the record carefully before deleting it.

**Tip:** Keep assessment results and remarks accurate and up to date so that student performance can be tracked correctly.

## 5.6 Upload Assessment Using Excel

The screenshot shows a web interface for adding an assessment. At the top, there's a title bar 'Add Assessment'. Below it, under 'Entry Mode', there are two tabs: 'Direct Entry' and 'Upload Excel'. The 'Upload Excel' tab is active. Below the tabs is a large dashed box containing an upload icon (an arrow pointing up) and the text 'Upload Excel template'. Below this text is a smaller instruction: 'Download the template, select Student / Type / Scoring Metric from dropdowns, then upload the .xlsx file.' At the bottom of this dashed box are two buttons: 'Download Template' and 'Choose File (.xlsx)'. Below the dashed box, there is a 'Cancel' button.

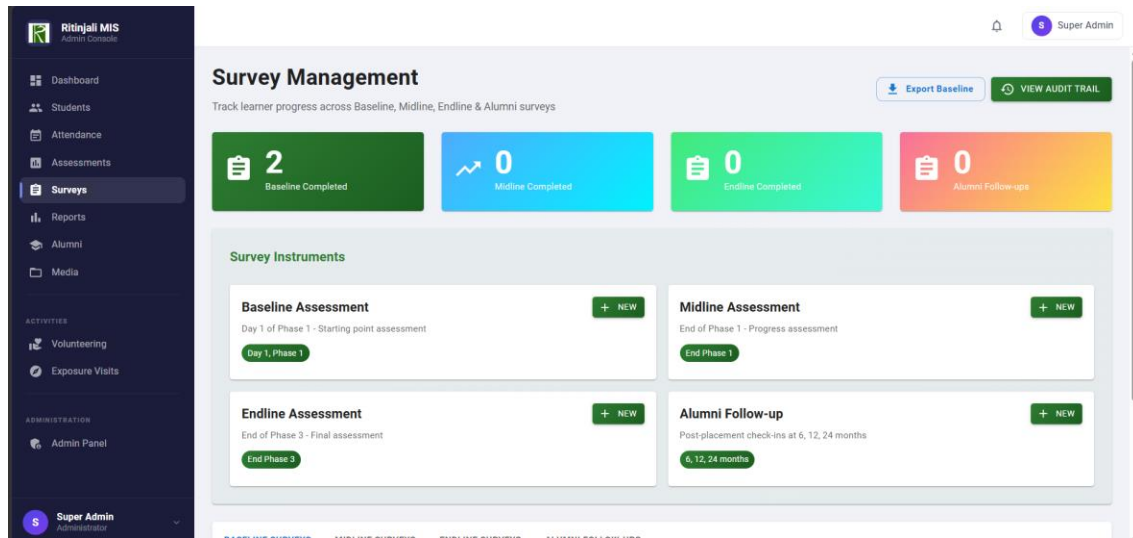

Assessment records can also be added in bulk using an **Excel (.xlsx) file**. This option is useful when multiple assessment records need to be entered at once.

### Steps

1. Click **Add Assessment** on the Assessments page.
2. In the **Add Assessment** window, open the **Upload**
3. Save the completed file in **.xlsx** format.
4. Return to the **Upload** tab in the MIS.
5. Review the uploaded information.
6. Submit the file to add the assessment records to the system.

**Note:** Use the provided template and select values from the available dropdowns to ensure that the assessment data is uploaded correctly.

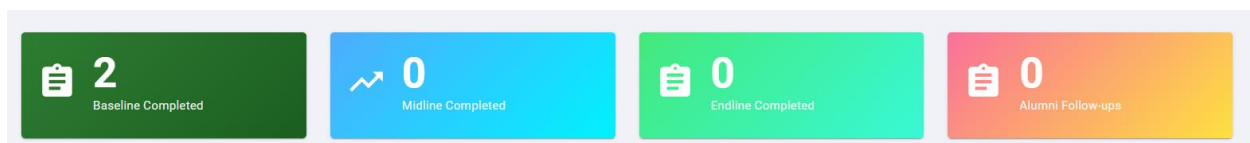

## 6. Surveys

The **Survey Management** section is used to track learner progress through different stages of the programme. It provides a centralized view of survey completion and allows users to manage the available survey instruments.

The survey page includes **Baseline**, **Midline**, **Endline**, and **Alumni Follow-up** surveys.

### 6.1 Survey Overview

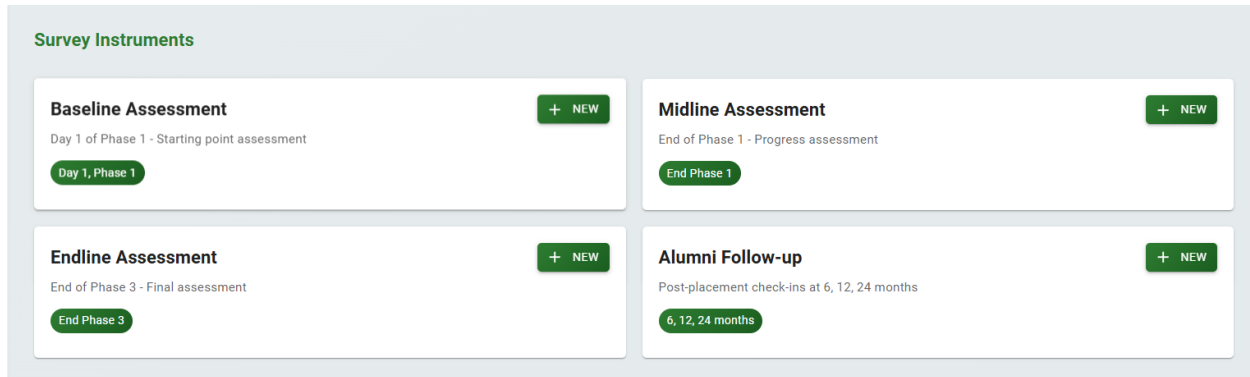

The top section provides a summary of survey completion:

- **Baseline Completed** — Number of completed baseline surveys.
- **Midline Completed** — Number of completed midline surveys.
- **Endline Completed** — Number of completed endline surveys.
- **Alumni Follow-ups** — Number of completed alumni follow-up surveys.

## 6.2 Survey Instruments

The **Survey Instruments** section contains the available survey types.

### Baseline Assessment

Used as the **starting point assessment** at Day 1 of Phase 1.

### Midline Assessment

Used as a **progress assessment** at the end of Phase 1.

### Endline Assessment

Used as the **final assessment** at the end of Phase 3.

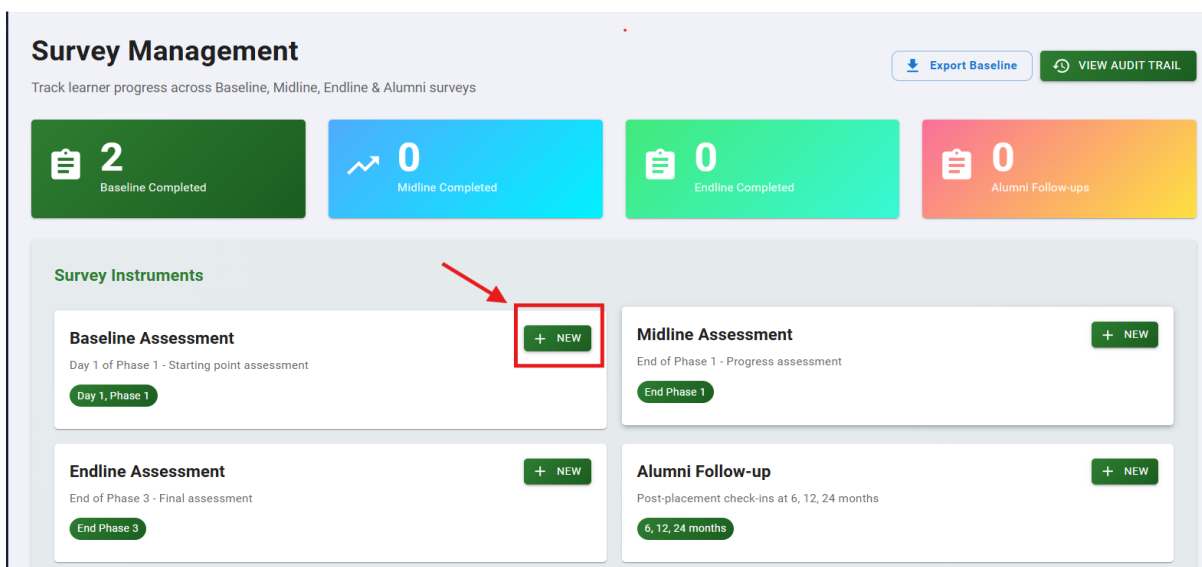

### Alumni Follow-up

Used for **post-placement follow-ups** at 6, 12, and 24 months.

Each survey instrument has a **New** button that can be used to create a new survey record.

## 6.3 Accessing a Survey

Users can access the different survey forms directly from the **Survey Management** page.

## Steps to Open a Survey

1. Open **Surveys** from the sidebar.
2. Locate the required survey under **Survey Instruments**.
3. Select the appropriate survey:
  - a. **Baseline Assessment**
  - b. **Midline Assessment**
  - c. **Endline Assessment**
  - d. **Alumni Follow-up**
4. Click the + **New** button on the corresponding survey card.
5. The selected survey form will open.

The survey form begins with basic information such as:

- **Select Student\*** — Select the student for whom the survey is being conducted.
- **Administered by\*** — Displays the user administering the survey.
- **Study Centre\*** — Enter or select the relevant study centre.

After selecting the student, information available in the student's profile may automatically populate matching fields in the survey. These fields can still be edited where required.

The survey is divided into different sections, with questions displayed under each section. Complete the required questions and proceed through the survey.

**Note:** Fields marked with (\*) are **mandatory** and must be completed before submitting the survey.

## 6.4 Survey Records

| BASELINE SURVEYS   MIDLINE SURVEYS   ENDLINE SURVEYS   ALUMNI FOLLOW-UPS |            |                         |       |           |         |
|--------------------------------------------------------------------------|------------|-------------------------|-------|-----------|---------|
| Student Name                                                             | Date       | Study Centre            | Round | Status    | Actions |
| kumar                                                                    | 2026-08-13 | Ritinjali Jaipur Centre | 1     | Completed |         |
| Ram                                                                      | 2026-08-13 | Ritinjali Jaipur Centre | 1     | Completed |         |

The **Survey Records** section displays the surveys that have already been created for students. Users can switch between different survey categories using the tabs at the top:

- **Baseline Surveys**
- **Midline Surveys**
- **Endline Surveys**
- **Alumni Follow-ups**

Each survey record displays:

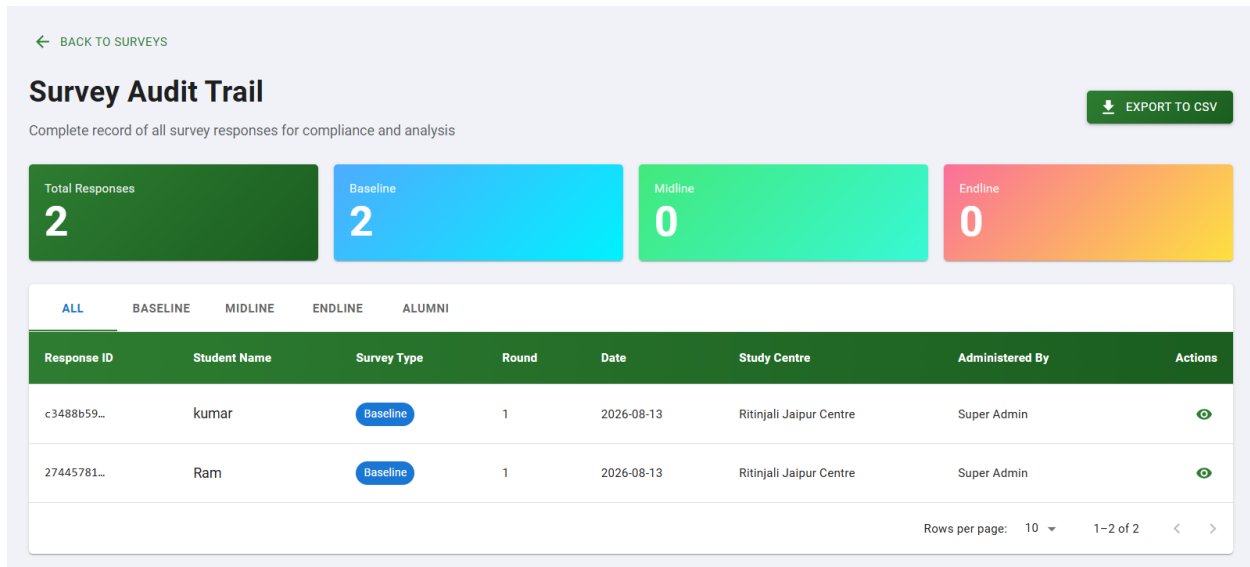

- **Student Name** — Name of the student for whom the survey was completed.
- **Date** — Date on which the survey was conducted.
- **Study Centre** — Centre associated with the survey.
- **Round** — Survey round number.
- **Status** — Shows the current status of the survey, such as **Completed**.
- **Actions** — Provides the option to view the survey record.

### Viewing a Survey

1. Select the required survey category using the tabs.
2. Locate the required student record.
3. Click the **View (eye)** icon under Actions.
4. The completed survey information will be displayed for review.

**Tip:** Use the survey tabs to quickly switch between different stages of the learner's survey journey.

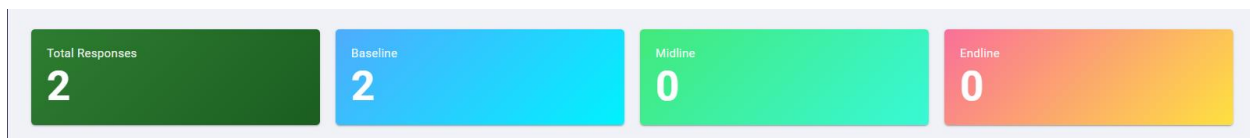

## 6.5 Survey Audit Trail

The **Survey Audit Trail** provides a complete record of survey responses for monitoring, compliance, and analysis. This section allows authorized users to review survey activity recorded in the system.

**Access:** The Survey Audit Trail is restricted to users who have the required permission to view survey records.

### Survey Summary

The summary cards display:

- **Total Responses** — Total number of survey responses recorded.
- **Baseline** — Number of Baseline survey responses.
- **Midline** — Number of Midline survey responses.
- **Endline** — Number of Endline survey responses.

### Survey Filters

Users can filter the records using the available tabs:

- **All**
- **Baseline**
- **Midline**
- **Endline**
- **Alumni**

## **Survey Records**

Each record displays:

- **Response ID**
- **Student Name**
- **Survey Type**
- **Round**
- **Date**
- **Study Centre**
- **Administered By**
- **Actions**

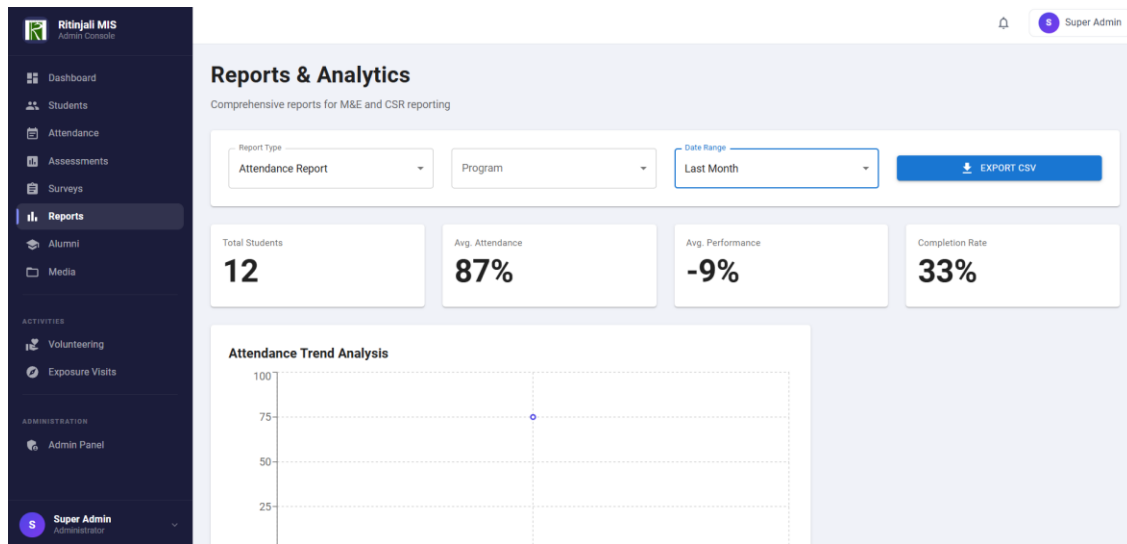

The **View** icon under Actions can be used to view the corresponding survey response.

## **Export to CSV**

The **Export to CSV** option allows authorized users to export the survey audit records in CSV format for further analysis or record keeping.

**Note:** Survey information is sensitive. Only users with the appropriate permissions should access, review, or export survey records.

# 7. Reports & Analytics

The **Reports & Analytics** section provides consolidated information from the MIS for **Monitoring & Evaluation (M&E)** and **CSR reporting**. Users can select the required report type, programme, and date range to view the relevant data and download reports.

## 7.1 Report Filters

The report page provides the following filters:

- **Report Type** — Select the type of report to view.
- **Program** — Select the programme for which the report is required.
- **Date Range** — Select the period for the report.
- **Export CSV** — Export the selected report data in CSV format.

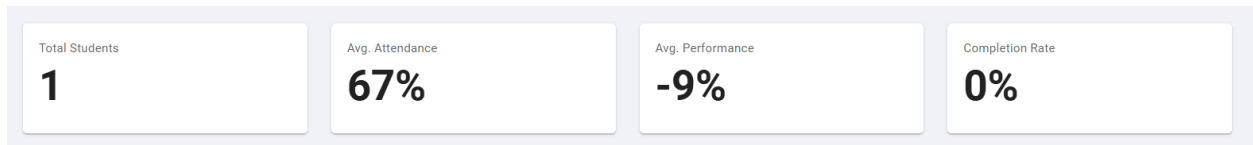

### Available Report Types

The **Report Type** dropdown includes:

- **Attendance Report**
- **Student Progress**
- **Assessment Report**
- **Outcome Tracking**
- **CSR Reporting**

Select the appropriate report type based on the information required.

## 7.2 Report Summary

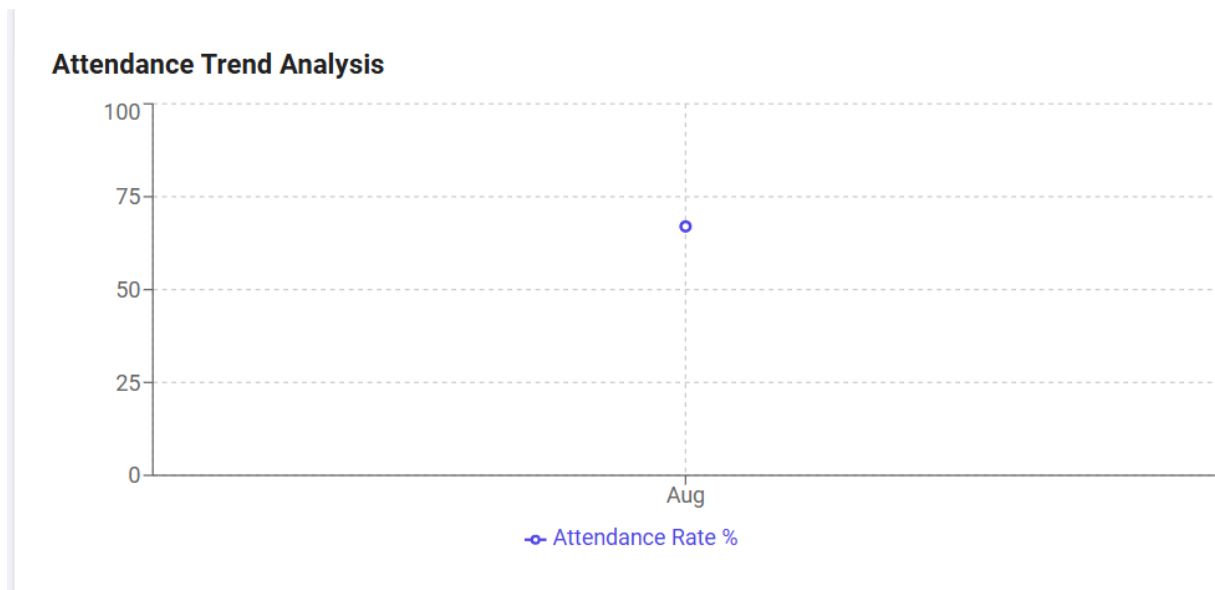

After selecting the required filters, the page displays relevant summary information. Depending on the selected report, the dashboard may display indicators such as:

- **Total Students**
- **Average Attendance**
- **Average Performance**
- **Completion Rate**

The information shown changes according to the selected report, programme, and date range.

## 7.3 Report Analysis

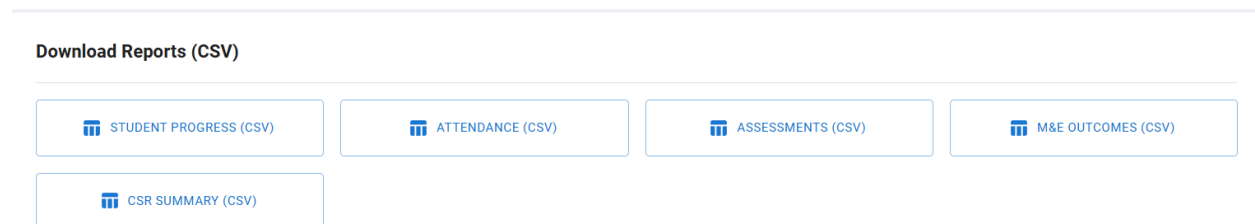

The report page may display the selected information in graphical form, such as the **Attendance Trend Analysis**. These visualizations help users understand trends and compare the available data for the selected period.

## 7.4 Exporting a Report

To export a report:

1. Select the required **Report Type**.
2. Select the **Program**.
3. Select the required **Date Range**.
4. Review the displayed information.
5. Click **Export CSV**.
6. The report will be downloaded in CSV format.

## 7.5 Download Reports

The **Download Reports (CSV)** section provides direct access to commonly used reports.

Available downloads include:

- **Student Progress (CSV)**
- **Attendance (CSV)**
- **Assessments (CSV)**
- **M&E Outcomes (CSV)**
- **CSR Summary (CSV)**

Click the required report to download the corresponding CSV file.

**Tip:** Select the appropriate report type, programme, and date range before exporting to ensure that the report contains the required information.

| Showing 4 alumni records                    |                                       |                   |              |             |          |              |         |

The alumni table provides details of individual alumni records, including:

- **Name** — Name of the alumnus/alumna.
- **Batch** — Programme and batch completed.
- **Status** — Current outcome, such as **Employed** or **Further Education**.
- **Organisation** — Organisation where the alumnus/alumna is employed, where applicable.
- **Sector** — Employment sector.
- **Salary** — Monthly salary, where applicable.
- **Last Updated** — Date on which the record was last updated.
- **Actions** — Option to edit the alumni record.

Add Record

To add a new alumni record:

1. Click **Add Record**.
2. Enter the required alumni information.
3. Provide the relevant post-completion details such as employment or further education.
4. Save the record.

## 8.4 Editing an Alumni Record

1. Locate the required alumni record in the table.
2. Click the **Edit (pencil)** icon under **Actions**.
3. Update the required information.
4. Save the changes.

## 8.5 Importing Alumni Records

Alumni records can also be added in bulk using an Excel file.

1. Click **Download Template** to download the required Excel format.
2. Enter the alumni information in the template.
3. Save the completed .xlsx file.
4. Click **Import Excel**.
5. Select and upload the completed file.
6. Verify that the records have been imported correctly.

## 9. Media

**Media**

Upload documents, then copy the protected API URL into student forms or the import spreadsheet. Opening files requires login.

The **Media** section is used to upload and manage documents, images, and other files that are required across different MIS modules. Uploaded files can be linked to relevant students or activities and accessed through protected URLs.

### 9.1 Uploading a File

To upload a new file:

1. Click **Upload File**.
2. Select the required file from your computer.
3. Select the relevant **Module** or source.
4. Provide the required linking information, if applicable.
5. Upload the file.
6. The uploaded file will appear in the Media table.

## 9.2 Media Records

The media table displays:

- **File** — Name of the uploaded file.
- **Type** — File format, such as PDF, PNG, or JPEG.
- **Source** — Module from which the file originates.
- **Linked To** — Student, activity, or other record associated with the file.
- **URL** — Protected URL generated for the uploaded file.
- **Uploaded** — Date and time when the file was uploaded.
- **Actions** — Available actions such as copying the URL, opening the file, or deleting it.

## 9.3 Using the File URL

The generated **protected API URL** can be copied and used in relevant **student forms or import spreadsheets** where a file URL is required.

Click the **Copy** icon under Actions to copy the file URL.

**Note:** Opening uploaded files requires login and appropriate access permissions.

## 9.4 Searching and Filtering

Use the **Search** field to find a file by its name. The **Module** filter can be used to view files associated with a particular module.

- All modules
- Direct upload
- Student
- Volunteering
- Exporsure visit

The **Volunteering Activities** section is used to record and track community and volunteering activities conducted by students. It provides an overview of activities, student participation, and activity details.

### 10.1 Activity Overview

| Total Activities | Total Participations | Avg Students / Activity |
|------------------|----------------------|-------------------------|
| 3                | 65644                | 21881                   |

The summary cards provide quick information about:

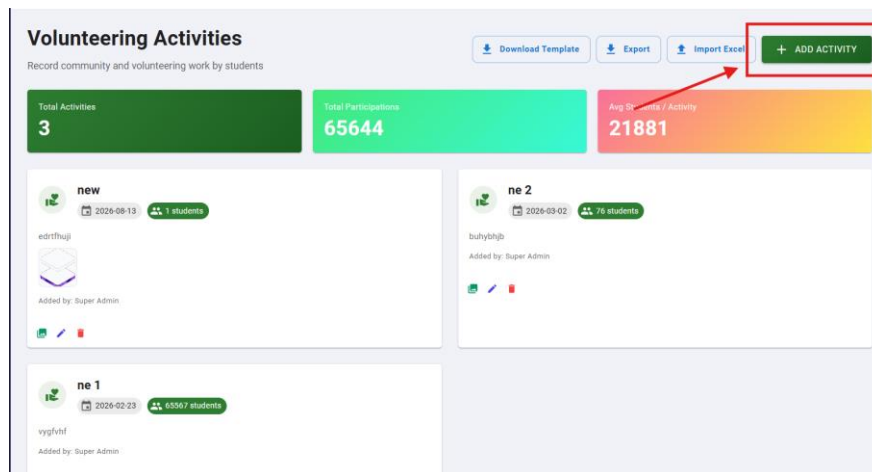

- **Total Activities** — Total number of volunteering activities recorded.
- **Total Participations** — Total number of student participations across activities.
- **Avg Students / Activity** — Average number of students participating in each activity.

## 10.2 Activity Records

Each activity is displayed as a card containing key information such as:

- **Activity Name**
- **Activity Date**
- **Number of Students**
- **Activity Description**
- **Added By** — User who created the activity.
- **Actions** — Options to view associated media, edit, or delete the activity.

## 10.3 Adding an Activity

### Add Exposure Visit

|                                                                  |                                                      |

CANCEL

ADD

To record a new volunteering activity:

1. Click **Add Activity**.
2. Enter the required activity details.
3. Add the relevant student participation information.
4. Add supporting media, if required.
5. Save the activity.

The newly created activity will appear in the activity list.

## 10.4 Managing Activities

Use the available action icons on an activity card to:

- **View Media** — View images or supporting files associated with the activity.
- **Edit** — Update activity information.
- **Delete** — Remove an activity record.

## 10.5 Importing and Exporting Data

### Exposure Visits

Document industry visits and field trips for students

Download Template

Export

Import Excel

+ ADD VISIT

The page also provides options for managing activity records in bulk:

- **Download Template** — Download the Excel template for entering activity data.
- **Import Excel** — Upload activity records using the completed Excel template.
- **Export** — Download existing volunteering activity data for reporting or record keeping.

**Note:** Keep activity and participation records updated to maintain an accurate record of student engagement in community and volunteering activities.

## 11. Exposure Visits

The screenshot displays the 'Exposure Visits' section of the Ritinjali MIS Admin Console. The sidebar on the left contains navigation links for Dashboard, Students, Attendance, Assessments, Surveys, Reports, Alumni, Media, and a section for ACTIVITIES (Volunteering, Exposure Visits) and ADMINISTRATION (Admin Panel). The main content area shows the 'Exposure Visits' title with a subtitle 'Document industry visits and field trips for students'. At the top right of the main area are buttons for 'Download Template', 'Export', 'Import Excel', and '+ ADD VISIT'. Below these are three summary cards: 'Total Visits: 3' (blue), 'Total Participants: 5520' (green), and 'Avg Students / Visit: 1840' (orange). The main area lists three visits: 'org1' (2026-08-13, 10 students, IT), 'org 11' (2026-03-02, 65 students, Logistics), and 'org 2' (2026-03-02, 5445 students, Apparel). Each entry includes a location pin, a map thumbnail, and a note 'Added by: Super Admin'.

The **Exposure Visits** section is used to record and track **industry visits, field trips, and other exposure activities** attended by students. It helps maintain a record of student participation and the organisations or sectors visited.

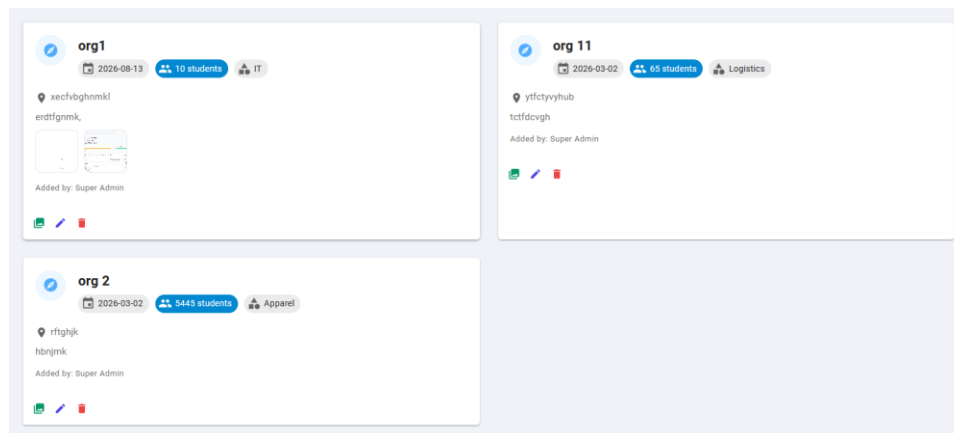

## 11.1 Visit Overview

The summary cards provide quick information about:

- **Total Visits** — Total number of exposure visits recorded.
- **Total Participants** — Total number of student participations across all visits.
- **Avg Students / Visit** — Average number of students participating in each visit.

## 11.2 Visit Records

Each visit is displayed as a card containing:

- **Organisation / Visit Name**
- **Visit Date**
- **Number of Students**
- **Sector** — Industry or sector associated with the visit.
- **Location**
- **Description**
- **Added By** — User who created the visit record.
- **Media** — Images or supporting files attached to the visit.

To add a new visit:

**Add Exposure Visit**

Organization / Institute Name \*

Address \*

Sector \* Visit Date \*  
08/27/2026

Number of Students Visited \*  
0

Detailed Description of the Visit \*

CANCEL ADD

1. Click **Add Visit**.
2. Enter the required visit details.
3. Add the participating students.
4. Enter the organisation, sector, location, and other relevant information.
5. Add supporting images or files, if required.
6. Save the visit.

The new visit will appear in the Exposure Visits list.

## 11.4 Managing Visit Records

The action icons on each visit card can be used to:

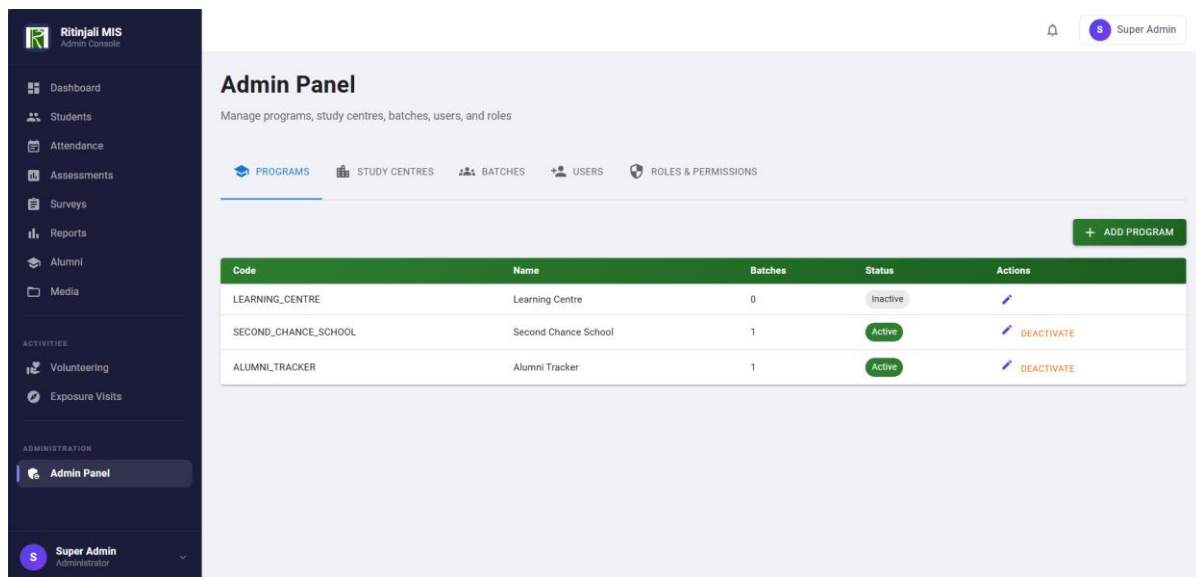

- **View Media** — View images or files attached to the visit.
- **Edit** — Update the visit information.
- **Delete** — Remove the visit record.

## 11.5 Importing and Exporting

The page supports bulk data management through Excel:

- **Download Template** — Download the Excel template for entering visit records.
- **Import Excel** — Upload completed visit records using the template.
- **Export** — Download existing exposure visit data for reporting or record keeping.

# 12. Admin Panel

The **Admin Panel** is used to manage the main system settings, including **Programs, Study Centres, Batches, Users, and Roles & Permissions**.

## 12.1 Navigate to Admin Panel

1. Log in to the **Ritinjali MIS Admin Console**.
2. From the left-side navigation menu, go to **Administration**.
3. Click **Admin Panel**.
4. The Admin Panel opens with different management sections displayed as tabs.

## 12.2 Programs

+ ADD ROLE

| Name        | Description                         | Permissions | Type   | Actions                                                                 |
|-------------|-------------------------------------|-------------|--------|-------------------------------------------------------------------------|
| Super Admin | Full system access                  | 45          | System | <a href="#">PERMISSIONS</a>                                             |
| Teacher     | Teacher access for assigned classes | 12          | System | <a href="#">PERMISSIONS</a>                                             |
| Teachers    | Test                                | 0           | Custom | <a href="#">PERMISSIONS</a> <a href="#">EDIT</a> <a href="#">DELETE</a> |

**Note:** Only users with **Super Admin permissions** can manage roles and permissions. Other users can access the system only according to the permissions assigned to their role.

The screenshot shows a web interface titled "Permissions — Super Admin". It contains three sections of permissions, each with a "SELECT ALL" and "CLEAR" link. All permissions are checked with blue checkmarks.

| Category   | Permission        | Description                | Status                       |         |
|------------|-------------------|----------------------------|------------------------------|---------|
| Activities | activities.create | Create activities          | Checked                      |         |
|            | activities.delete | Delete activities          | Checked                      |         |
|            | activities.export | Export activities to Excel | Checked                      |         |
|            | activities.update | Update activities          | Checked                      |         |
|            | activities.view   | View activities            | Checked                      |         |
|            | Admin             | admin.roles.manage         | Manage roles and permissions | Checked |
|            |                   | admin.users.manage         | Manage users                 | Checked |
| Alumni     |                   | alumni.create              | Create alumni records        | Checked |
|            | alumni.delete     | Delete alumni records      | Checked                      |         |
|            | alumni.export     | Export alumni to Excel     | Checked                      |         |
|            |                   |                            |                              |         |

45 permission(s) selected

[CANCEL](#) [SAVE PERMISSIONS](#)

1. Go to **Admin Panel** from the left-side menu.
2. Select the **Roles & Permissions** tab.
3. Select the required role, such as **Super Admin**.
4. Review the permissions assigned to that role.
5. Enable or disable permissions as required.
6. Save the changes to apply the updated access.

**Important:** Permissions control access to system data and actions. Only authorized administrators should modify roles and permissions.

## Super Admin Permissions

The **Super Admin** has extensive access across the MIS, including administrative functions and the major operational modules.

## Understanding Permission Types

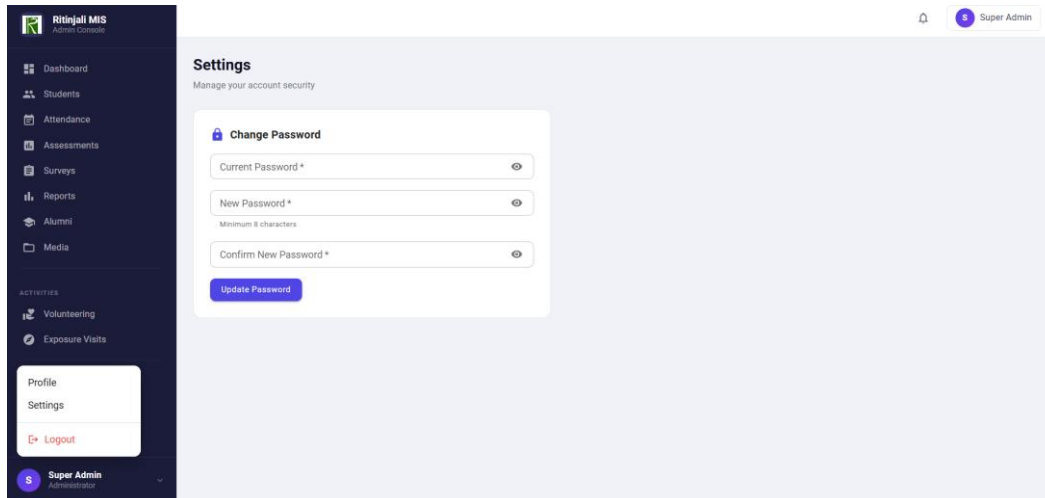

Permissions generally follow a simple structure:

- **View** — Allows the user to see records and information.
- **Create** — Allows the user to add new records.
- **Update** — Allows the user to edit existing records.
- **Delete** — Allows the user to remove records.
- **Export** — Allows the user to download module data as an Excel file.
- **Manage** — Provides broader administrative control over a particular area.
- **\* (Wildcard)** — Gives access to **all permissions within that module**.

For example, `attendance.*` provides all available attendance permissions, while `attendance.view` only allows the user to view attendance information.

**Best Practice:** Give users only the permissions required to perform their assigned responsibilities. Avoid providing administrative or delete permissions unless they are necessary.

## 13. Settings

The **Settings** section allows users to manage their account security, mainly by changing their account password.

### 13.1 Accessing Settings

1. Click your **profile name** at the bottom-left corner of the screen.
2. From the menu, select **Settings**.
3. The Settings page will open with the **Change Password** option.

### 13.2 Change Password

To update your password:

1. Enter your **Current Password**.
2. Enter your **New Password**.
  - a. The new password must contain at least **8 characters**.
3. Enter the same password again in **Confirm New Password**.
4. Click **Update Password**.
5. If the details are valid, your password will be updated.

**Note:** Keep your password confidential and do not share it with other users.

## 14. Logout

To securely exit the MIS:

1. Click your **profile name** at the bottom-left corner.
2. Select **Logout** from the menu.
3. You will be signed out and redirected to the login page.

**Note:** Always log out when you have finished using the MIS, especially when accessing it from a shared or public computer.
